

JOSH MANDEL

STATE TREASURER OF OHIO

The CPIM (Center for Public Funds Managers) Academy allows public funds managers to increase their financial competencies in managing and safeguarding Ohio's tax dollars. Participants can select from a variety of course offerings, taught by leading professionals in their fields of expertise.

The goal, as stated in Ohio Revised Code, is to enhance participants' background and working knowledge in finance, investments, cash management (including debt issuance and debt management), and ethics.

The courses are structured to meet the various levels of education and experience of Ohio's public funds managers. Modeled after the traditional collegiate structure, the course numbering series is designed to address fundamentals (100-level classes), as well as more advanced topic areas (200 to 400-level classes).
